## Florida Department of Health MQA

### License Verification and Practitioner Profile Website

#### Authorized to Order Medical Marijuana and Low-THC Cannabis Indicator

Some physicians may qualify to order medical marijuana and low-THC cannabis for their patients. In order to qualify, a physician must have an active, unrestricted license as a physician under Chapter 458, F.S., or osteopathic physician under Chapter 459, F.S. Additionally, a physician employed as a medical director by a medical marijuana treatment center may not order medical marijuana for patients. Successful completion of the course is required each time a physician renews his or her license.

Physicians that have completed the required course and examination provided by the Florida Medical Association and the Florida Osteopathic Medical Association will have their license record on the License Verification and Practitioner Profile websites updated. The websites are located at <https://appsmqa.doh.state.fl.us/MQASearchServices/Home> . The update will reflect the physician is authorized to order medical marijuana and low-THC cannabis. An example of how this will appear online is shown in the screen shots below.
